

SF-01: Fire Blanket Technical Specifications

Product Code	SF-01	
Description	Texturized Glass Fabric Heat Treated	
Colour	Milky White	
Weight	450 Gram/Sqm +/- 10%	
Thickness	0.50mm +/- 10%	
Width	1Mtr (100 Cm)	
Yarn Thickness (Tex)	Warp	Weft
	EC 9 33 4*2	EC 9 33 18*12
Tensile Strength	3544N/5CM (400 Lbs/Inch)	3544N/5CM (400 Lbs/Inch)
Temperature Resistance	550°C	
Treatment	<p>This fabric is Silane Treated. After treatment with specially develop finish the fabric will then outperform asbestos (without the environmental hazards) and is a low cost alternative to silica and ceramic fabrics in many high temperature applications especially where its superior tensile strength and abrasion resistance can be exploited.</p>	
Application	<p>This fabric is suitable for Light Duty protection used as Vertical Curtain for protection from Light Welding Spatter & metal grinding operations. Also used in Residential & Industrial Safety Applications.</p>
